

This is flyer version 1. Higher version will be sent when updated.

Next version will include detailed programs and names of invited speakers.

<http://www.auc2013.com>

The AUC2013 Organizing Committee cordially invites you to participate in the **21st International Conference on Analytical Ultracentrifugation, Hydrodynamics, Thermodynamics and Complementary Methods**. This is the first time that the conference will be held within the Asian region. The emphasis of this conference is focused on topics related to structure and functional analysis of biological macromolecules, synthetic high polymers, and nanoparticles in the solution phase, including:

- technical and methodological innovations in solution studies
- innovations in data analysis and hydrodynamic modeling
- high-concentration systems
- cross-cutting techniques (analytical ultracentrifugation, static/dynamic light scattering, small angle X-ray scattering, micro-calorimetry, mass spectrometry, NMR, surface plasmon resonance, field flow fractionation, ITC, etc.)
- synthetic polymers, colloids, nanomaterials and material sciences
- biological systems, interacting systems and supramolecular assemblies.

Conference Dates:

- **Workshops:** September 23rd – 25th
- **Symposium:** September 25th – 28th

Abstract Submission: May 1 – June 30 (talks); May 1 – July 31 (posters)

Early Registration: May 15 – June 30

AUC2013 will be held at Hotel New Akao in Atami, Shizuoka prefecture, Japan. Atami is approximately 100km from Tokyo and only 50min by Super Express train (Shinkansen). The city name literally means "hot ocean", a reference to the town's famous "onsen" hot springs.

We look forward to welcoming you to Atami in September 2013!

Fumio Arisaka, Conference chairman
